UseThisSI

The Builder's 5-Minute AI Stack Kit

Pick the right AI tool for any job in 5 minutes. Real prices, checked every week. Free.

October 2026 edition · 10 jobs · 77 tools · prices checked Oct 18 to Oct 22, 2026

- Best tool for each job, with price and free tier
- 4 starter stacks under $50/mo
- The Skip List
- The $0 Stack: every job on free tiers
- First-hour quickstarts
- Our 24-hour wrong-price guarantee

www.usethissi.com

Start here How to use this kit in 5 minutes

1. **Find your job** on the next pages (building an app, writing, research, video, voice and more). Use the **Top Pick** unless you have a reason not to.
2. **Check the free tier** and the date we last checked the price. If you'd rather not pay yet, jump to **The $0 Stack**.
3. **Got a budget and a role, not a job list?** Grab one of the **4 starter stacks**, each under $50 a month.
4. **Do the first-hour quickstart** for your pick so you get a real result in your first session.

How we pick and check

- One Top Pick per job, chosen for fit for busy builders, not for who pays us.
- Every price comes from the vendor's own pricing page, with the date we checked it. If we couldn't verify a price, we say so instead of guessing.
- 77 of 77 tools were checked in the last 30 days. Prices change, so confirm on the vendor's site before you buy.
- Some links on our site are affiliate links. They're always labeled and never change our picks.

Our guarantee: wrong price, fixed in 24 hours

Found a price or free tier in this kit that's wrong? Reply to any UseThisSI email or write to info@usethissi.com. We'll fix it on the site within 24 hours and thank you in the brief.

Every weekday brief reads in 5 minutes or less. One-click unsubscribe, any time.

Best tool for each job Jobs 1-3 of 10

Aider open-source pair programmer, bring your own key	Free	Oct 20, 2026

Creator — $31/mo

Video, voice and music for content

Runway generative video (Standard, monthly)	$15	Oct 21, 2026
ElevenLabs voiceover (Starter)	$6	Oct 19, 2026
Suno music with commercial rights (Pro, monthly)	$10	Oct 21, 2026
CapCut final cut on the Free plan	Free	Oct 22, 2026

First-hour quickstarts

Get a real result in your first session

One setup tip per top pick. Do this first and you'll get something useful before the free trial runs out.

Lovable · Vibe-code an app or landing page

Write a one-paragraph spec (pages, users, data) before your first prompt, and connect GitHub early so you own the code.

Cursor · AI coding assistant

Add a project rules file describing your stack and conventions; it keeps every agent edit on-style.

n8n · Set up or run AI agents

Start from a community template, then swap in your credentials. Self-host with Docker if you want unlimited runs.

Make · Automate workflows

Build the scenario with 'Run once' and sample data first, then turn on scheduling. Watch your credit count.

Scenario · Make game art and sprites

Train a custom model on 10-20 of your own reference images so every asset stays in one consistent style.

Suno · Generate music and SFX

Put genre, tempo and mood in the style box and keep lyrics separate. Free tier is non-commercial, so upgrade before you ship.

Runway · Edit and generate video

Lock a strong still image first, then animate it; image-to-video gives far more control than text alone.

Claude · Write content

Create a Project with your style guide and examples attached so every draft starts with your context.

Perplexity · Research

Use Spaces to save sources and instructions per topic, and always click through to verify key citations.

ElevenLabs · Voice and TTS

Clone your voice from a clean 1-2 minute recording in a quiet room; audio quality matters more than length.

The Skip List

Tools we'd skip right now, and why

These aren't bad tools. They're ones we can't recommend to a busy builder today, mostly because we couldn't confirm what they cost. When that changes, they come off the list and you'll hear about it in the brief.

SKIP FOR NOW	WHY	USE INSTEAD
Tabnine AI coding assistant	Sales-only pricing; no self-serve plan we can verify.	Cursor
Gemini agent (Google Cloud) Set up or run AI agents	Sales-only pricing; no self-serve plan we can verify.	n8n
Roboflow Agent Set up or run AI agents	Beta or early access; pricing isn't final yet.	n8n
CopilotKit CLiF Set up or run AI agents	Beta or early access; pricing isn't final yet.	n8n
BAND Set up or run AI agents	No public price we could verify.	n8n
Snyk Evo Set up or run AI agents	Sales-only pricing; no self-serve plan we can verify.	n8n

Stay current in 5 minutes a day

Prices and free tiers change every week. This kit is the October 2026 edition, and subscribers get each new edition automatically.

- **The weekday brief:** what launched, what changed, and what's worth trying today. Five minutes, Monday to Friday.
- **Price-change alerts:** when a tool in this kit changes its price or free tier, you hear it in the brief first.
- **Full directory:** every job, every tool, with alternatives and last-checked dates at www.usethissi.com.

Know a tool that belongs here, or spot a wrong price? Reply to any brief or email info@usethissi.com. We fix wrong prices within 24 hours.
